

## **FASTENER**

---

Tekfor offers a complete portfolio of products and competent support services for the use of safety-critical axle, transmission and wheel applications. Known as the inventor of the two-piece wheel nut, we have been a global leader in the area of wheel mounting technology for trucks since 1972.

Today, we manufacture safety-relevant applications on three continents, as well as specialized spindle nuts and transmission nuts. Our ENKO® all-metal lock nut has earned a distinguished reputation as a technical system and problem solution for trucks and cars.

## **NT® SPIDER NUT**

- Free adjustment position
- Can be used with or without preload
- Precise locking position
- Quick and easy installation
- Low system costs
- No cross holes for safety pin required

## **NT® WHEEL NUT**

- High level of know-how in development and production
- Optimized design and high precision preload
- Worldwide delivery possible

## **DOUBLE NUTS**

- Reduction of the required installation space in comparison to conventional flange solution
- Reduction of mass and unbalance
- Simplified assembly
- Unscrewing protection adjustable with high-precision

## **ENKO® ALL-METAL LOCK NUT**

- ENKO® offers one of the highest lock torques with outstandingly low dispersion at the same time
- Every ENKO® is designed, tested and produced taking individual customer requirements into account
- All measurements and tests during series production take place on the company's own measuring machines and test benches
- Precise axial run-out
- Tight tolerances
- Constant prevailing torque
- Reusable
